Search Strategy for Patent application number :- ISAIN2025000842	
Technical Problems to be solved	Traditional career counseling does not offer personalized insights and cannot adapt to real-time labor market dynamics. It also does not provide predictive guidance, resulting in inefficient skill development and job search strategies. The proposed invention addresses these gaps using AI-based automation and predictive models to offer real-time adaptability and customized career recommendations. Unlike existing systems, it dynamically aligns user profiles with future opportunities, ensuring more effective and forward-looking career planning.
Present application	The current application relates to career counseling using AI and machine learning. It introduces a data-driven system offering personalized career guidance, skill evaluation, job-matching features, and career path prediction.
